

FIG. 1

This diagram shows a detailed cross-section of a container assembly. At the top, there's a curved structural element labeled 40, which supports a series of layers or panels labeled 41 and 42. Below these, a large cylindrical tank (30) is positioned. Two vertical pipes, 16 and 17, extend from the bottom of the tank upwards through various seals and valves. Pipe 16 has sections labeled 16a and 16b. Pipe 17 has a section labeled 17. Both pipes are equipped with valves or check valves labeled 24. The pipes terminate at the top in components labeled 62, 63, 64, 65, 68, 69, 70, and 71. The entire assembly is housed within a larger structure indicated by dashed lines and labels 10 and 14.
